

TEOCO Brings Powerful Network Cost Management, Revenue Assurance and Business Intelligence Solutions to the Cable Industry

Fairfax, Va., May 7, 2007 – TEOCO Corporation, the recognized leading provider of network cost management, revenue assurance and additional business intelligence solutions, today announced that it is leveraging its historical strength in the communications market to offer its full suite of products and services to the cable industry. Today, TEOCO provides auditing services and software solutions to many premier global cable operators, including Charter Communications (Nasdaq: CHTR) in the U.S.

TEOCO will partner with leading cable operators to implement solutions that can fully automate end-to-end communications expense processing from invoice receipt, through auditing, claim management and resolution. TEOCO will provide its renowned cost and revenue management software applications – including BillTrak Pro™, ViewLogic, XTrak and Claim Center – to aid cable providers in reducing costs, improving efficiency and achieving regulatory compliance. In addition, TEOCO will provide its robust Business Intelligence and analytics solutions, which are built on leading data warehouse appliances and can help operators address critical issues such as customer and product profitability, margin management and network optimization.

One TEOCO offering of particular relevance to cable providers is TEOCO's wholesale usage auditing capability, which allows cable companies to load all

invoice data from their wireless and wireline partners and utilize data warehouse technology to perform in-depth auditing and high-speed queries to identify billing anomalies. TEOCO offers this solution in terabyte increments to satisfy cable providers' current wireless usage volumes and to scale over time as their operations grow.

“Expanding our focus to address the specific needs of the cable industry is a natural fit for TEOCO,” said John Devolites, Vice President and General Manager of TEOCO’s Communications and Entertainment Solutions group. “As communications carriers and cable operators team up to drive next-generation, content-based services, their invoice automation, cost management and revenue assurance needs grow more complex. TEOCO is uniquely positioned to support this area of emerging need, and to likewise boost operators’ profitability with our Business Intelligence solutions.”

TEOCO is presenting its solution set at booth #2880 The Cable Show, May 7 – 9, 2007 in Mandalay Bay Convention Center, Las Vegas, NV. Additional information about The Cable Show can be found at:
