AcuWorld
International Least Cost Routing
AcuWorld

THE INDUSTRY’S MOST EFFECTIVE INTERNATIONAL ROUTING SOLUTION

Saves an average of 10% in measurable voice termination costs.

Making routing decisions taking into account vendor rate for Least Cost Routing (LCR), quality indicators for service grade agreements, minutes of use for volume commitments and cost to revenue ratios for margin protection, is a key challenge for service providers.

TEOCO’s AcuWorld gives users control over these factors in a single integrated platform.

With AcuWorld, wireline, wireless, cable and VoIP operators can route international voice traffic more optimally, saving millions in termination costs while ensuring a high quality of service.

AcuWorld’s digit routing provides the most optimal route solution by looking at cost, quality and margin information. AcuWorld is unique among international routing solutions, in that it routes at the digit level as opposed to the destination level thus reducing the incidence of rate disputes and saving service providers millions of dollars in termination costs. This patent pending process routes traffic on a call-by-call level, based upon a set of flexible, user-defined business rules.

Routes international traffic for some of the world’s largest carriers

- By switching to AcuWorld, a leading operator saved over $80 million in the first year alone.
- Another operator saves $40 Million every year because TEOCO was able to identify areas for improvement in its LCR solution
AcuWorld comprises several modules for routing, rate loading and pricing

**INroute – Managing the routing needs of hybrid networks**
AcuWorld’s INroute manages both TDM based and next gen technologies such as IMS, SBC, Softswitch, and VoIP. As such, it helps extending the life of existing network infrastructure while transitioning to today’s next-gen technologies. Supported by TEOCO’s technology partner NetNumber, INroute also enables operators to support an almost endless amount of routes by eliminating the dependence on switch translations.

**AcuDial™ – Automated rate loading tool**
AcuDial™ normalizes and loads rate details from thousands of complex rate sheets with unsurpassed speed, while checking for often costly errors that lead to unprofitable disputes. AcuDial allows service providers to take immediate advantage of lower rates and quickly identify and implement short-term ‘deals’ into their network.

**AcuPrice - gives carriers visibility into the complex factors behind price, cost, and quality**
With AcuPrice, service providers can quickly determine where their cost structure is increasing or decreasing and then generate the appropriate price sheets to their carrier customers. AcuPrice also manages margins at the product, customer, destination and even dial code levels, and will helps achieve revenue and margin goals.
KEY FEATURES & BENEFITS

OPTIMAL CALL ROUTING EVERY TIME, FOR EVERY CALL
• Extensive reporting capabilities
• Full route-class flexibility with call-by-call routing

MINIMIZE DISPUTES AND CHERRY PICKING
• Digit level routing
• Automated customer pricing and notification process

AUTOMATES SWITCH TRANSLATIONS

NEAR REAL-TIME VISIBILITY AND REPORTING
• Optimal cost routing management
• For costs, quality, revenue and margins

FASTER IMPLEMENTATION WITH MEASURABLE VALUE
• Comprehensive deal management capabilities

MAXIMIZE MARGINS
• By analyzing revenues, costs, quality, and customer traffic mix

VISIBILITY INTO ALL ASPECTS OF YOUR INTERNATIONAL VOICE BUSINESS

OFFERED AS A CLOUD-BASED SAAS, OR AS A LICENSED
TEOCO is a leading provider of analytics, assurance & optimization solutions to over 300 communication service providers (CSPs) and OEMs worldwide.

Our solutions enable the digital transformation of CSPs while enhancing their network QoS, improving their customer experience and reducing their operational costs.

Through advanced analytics and automation, TEOCO solutions provide actionable and measurable insights into network and customer behavior. This includes the optimization, effective monetization, and delivery of new and existing services, such as VoLTE and Video.

Our commitment to network flexibility and agility makes TEOCO the obvious choice for CSPs looking to leverage NFV/SDN and the rise of 5G, and to maximize the revenue potential of new opportunities tied to video and the emerging Internet of Things (IoT).

“TEOCO is bridging the gap between operations functions, particularly traditional engineering, planning and network optimization, and the business-defining monetization functions of revenue generation, customer experience, and margin management. Stratecast believes this makes TEOCO a company to watch.”
