ASSET 5G

Delivering high performance cost-effective 5G networks

ASSET 5G delivers all the capabilities you need to design the best 5G network possible.

For over 20 years, we have delivered the best network planning tools for every major mobile technology. We understand what it takes. ASSET 5G has been designed to meet your needs over the next decade as 5G grows and matures. Coping with the inevitable uncertainties and evolving to support new 5G technologies as they are developed.

We understand you value your existing investments in tools and business processes. Leveraging them is important to maintain efficient operations. This is why ASSET 5G features strong integration capabilities, ensuring it can be seamlessly integrated into your organization.

ASSET 5G – Helping you deliver on the benefits of 5G

STRATEGIC PLANNING

Maximize CapEx efficiency by validating 5G business cases and technology decisions

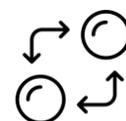

SCENARIO MODELING

Reduce time-to-market and maximize revenue potential with sound roll-out plans

NETWORK DESIGN

Reduce pressure on design teams with highly efficient planning and design optimization capabilities

MULTI-TECHNOLOGY

Maintain customer QoS by successfully integrating 5G and your existing network technologies

TEOCO is a network engineering tools market leader

In 2017, Analysys Mason again ranked TEOCO as a leading vendor of network engineering software tools.

ASSET 5G

Everything you need to plan state-of-the-art 5G networks

As new technologies such as 5G are adopted these need to be deployed on top of existing networks in the most cost-effective manner possible. This requires careful planning to ensure technology layers work together as a seamless network. Along with existing 2G, 3G and 4G support, ASSET is now a fully capable 5G radio planning tool. 5G NR modeling with advanced propagation models, complex antenna array and full multi-technology capacity simulation are all supported.

5G coverage analysis

The move to millimeter wave frequencies in 5G requires a new approach to coverage modeling. ASSET 5G uses advanced propagation models that account for multi-path propagation and reflections. High resolution 3D building vector data support ensures accurate coverage modeling of 5G frequencies. Beamforming antennas are also supported with multi-array support for adaptive and switched-beam arrays. This enables modeling of complex arrays such as MU-MIMO and SU-MIMO configurations.

5G traffic modeling

ASSET 5G covers the full gamut of 5G traffic modeling capabilities from 5G NR gNodeB definition to code assignment and mobility planning. Standards-defined NR frequency bands, frame structures, numerology and carrier definitions are all supported too. Analysis capabilities include simulator arrays, cell level outputs and inter-technology interference analysis. Finally 5G automatic cell planning (ACP) and automatic site placement (ASP) functionality helps operators design their 5G networks in record time.

A flexible and efficient approach to 5G planning

ASSET's multiple-technology project view ensures you can plan 2G/3G/4G and 5G networks concurrently in a single tool. A multi-user architecture ensures multiple engineers can work on the network at once with changes seamlessly synchronized. Support for multi-operator networks, LTE-5G spectrum sharing use cases and V-RAN / C-RAN architectures ensure ASSET can support you whatever your technology path.

ABOUT TEOCO

TEOCO is a leading provider of analytics, assurance & optimization solutions to over 300 communication service providers (CSPs) and OEMs worldwide.

Our solutions enable the digital transformation of CSPs while enhancing their network QoS, improving their customer experience and reducing their operational costs.

Through advanced analytics and automation, TEOCO solutions provide actionable and measureable insights into network and customer behavior. This includes the optimization, effective monetization, and delivery of new and existing services, such as VoLTE and Video.

Our commitment to network flexibility and agility makes TEOCO the obvious choice for CSPs looking to leverage NFV/SDN and the rise of 5G, and to maximize the revenue potential of new opportunities tied to video and the emerging Internet of Things (IoT).

**Global
